

Sanborn To Present Technology Solutions at the 2009 ESRI User's Conference in San Diego

Sanborn will be providing on-the-hour presentations in Booth #1800 during the 2009 ESRI User Conference on July 14 – 16. The presentations will demonstrate the ability to use LiDAR (LAS) data in the ARGIS environment. Learn techniques and take away ideas for using your LAS data. Earth Fire and Water solutions will be presented demonstrating the use of landcover and software analysis. Understanding the value of using 3D in your business will be presented with key messages about data quality and the ROI considerations.
