

Sanborn Invites States to Participate in Buy-Up Program for 2009

May 29, 2009 - Sanborn has invited the users of geospatial information to acquire imagery and value-added products in the western states of Colorado, New Mexico, Utah, Kansas and Wyoming. The program consists of medium to high resolution imagery and a variety of products that can be derived from the imagery such as contours, planimetric data, 3D buildings, landcover, impervious and Near Infrared.

Additional states will be announced in June.

The program is scheduled for collection and orders can be taken through the late fall of 2009. Interested parties should contact Sanborn at 866-726-2676 or information@sanborn.com
